

Głogów, 28 March 2022

Dear Sir/Madam,

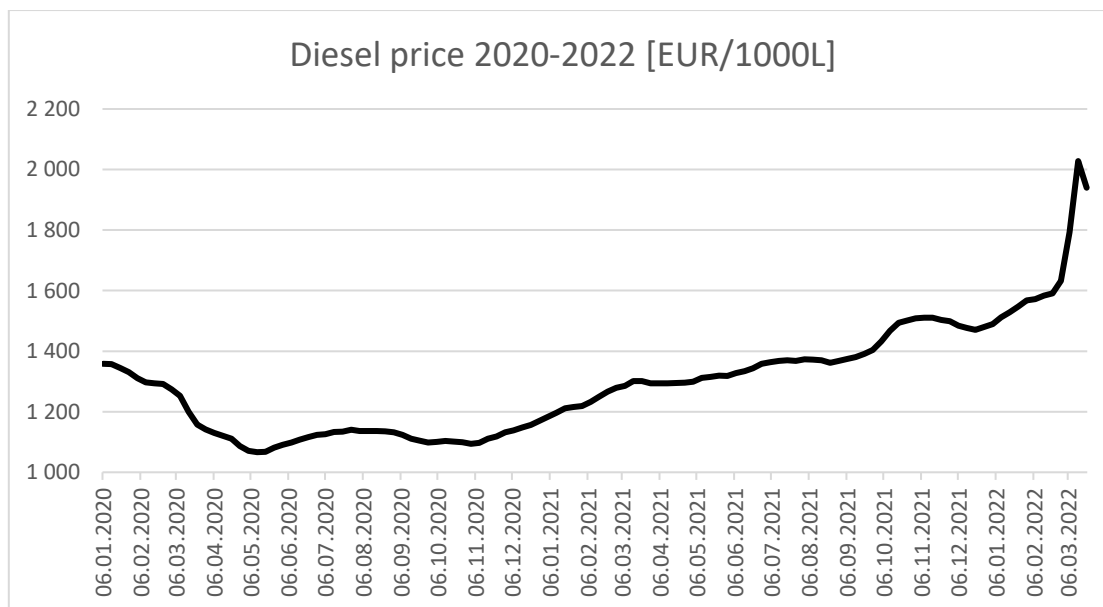

due to unprecedented volatility of the oil and diesel prices we need to react to maintain the transport capacity of required volume and quality.

Parallely, as an asset-based transport company, we cope with lately implemented Mobility Package and increased cost of drivers.

Both above-mentioned points account for approximately 60% of the total cost.

Since the end of February 2022, we have been observing a continuous increase in diesel prices.

The graph below explains the challenge.

Therefore, we will be reacting [more frequently](#) to the changing situation keeping all other rules (like base price, diesel share in our costs and source of data) of Diesel Adjustment Factor unchanged.

Source of data:	No change
https://energy.ec.europa.eu/data-and-analysis/weekly-oil-bulletin_en	
Diesel share:	No change
30% (each change of Diesel price of +/-3% drives the change of Diesel floater by +/-0,9%)	
Neutral area:	No change
from minus 2,99% to plus 2,99%	
Base price:	No change
1157,45 € / 1000 [2020 annual average]	
Frequency of application:	Change
After each new release of diesel price in weekly oil bulletin. Average of three last quotations will be used to determine the current diesel price. Three working days after release an updated Diesel Adjustment Factor will apply.	

Last three prices published:

Date	Gas oil automobile Automotive gas oil Dieselkraftstoff (I)
	1000L
21.03.22	1 939,45
14.03.22	2 027,95
07.03.22	1 792,97

Average value: 1920,12 € / 1000L EU 27

Therefore, DAF:

The changes on the fuel market are beyond our control. We are beginning to apply the increased frequency of DAF calculation for services provided from the 1st of April 2022. The value of the DAF will be posted on our website as before.

Yours faithfully,
